

# Bee aware!

## Number of beehives worldwide

The world map shows which countries have the highest ratio of beehives per square km of their area, with South Korea as the leader.

Number of beehives per square km

## Bees' favourite flowers

Oregano

Borage

Sahin's early flower

Cranesbill

Common sneezeweed

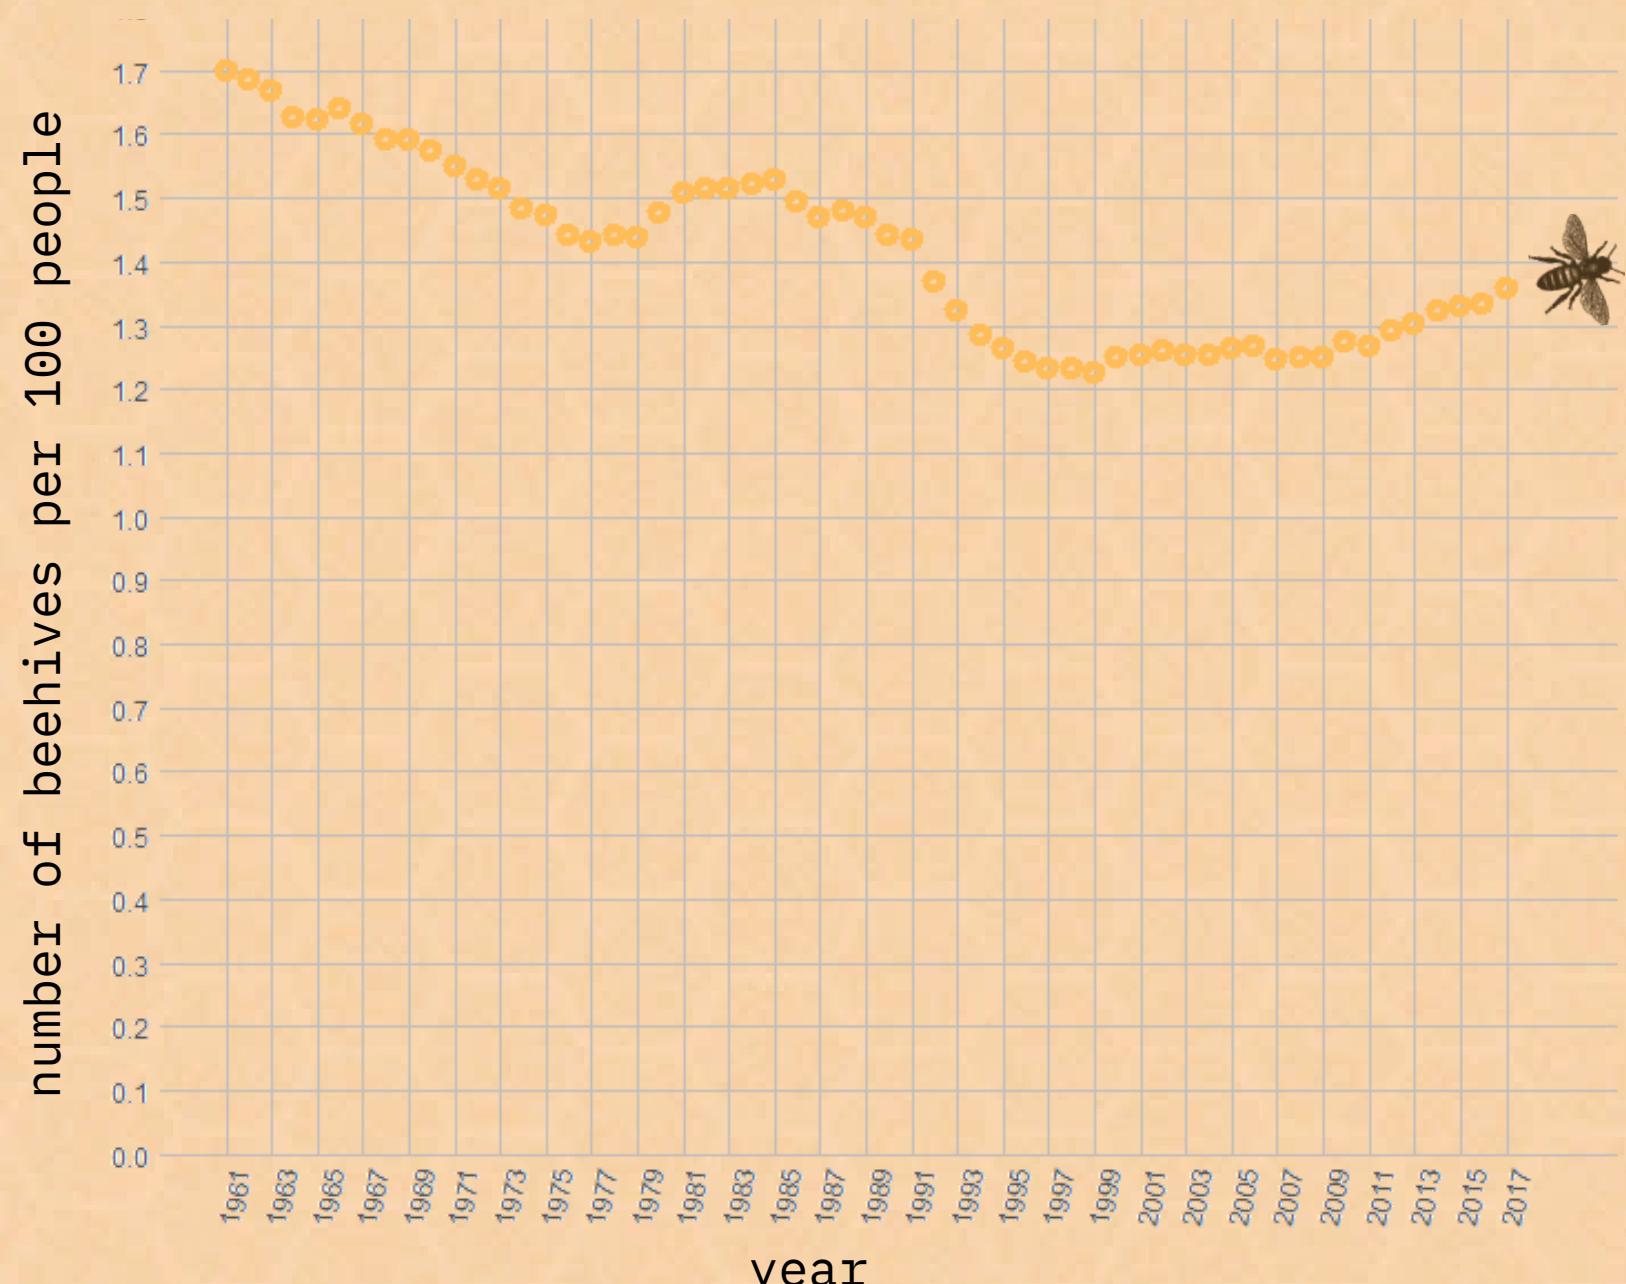

Calamintha nepeta

### What can we do to help our little friends?

There are fewer and fewer green areas in our neighborhood. An easy way to help bees to survive is planting in our gardens some flowers they could visit. Before that, you need to learn which plants our insects are fond of. In the diagram on the right, you can find their favourite ones. The choice is wide so you will surely find the one that will also suit your taste.

## Population of bees in the years 1961-2017

### How does the situation of bees present overtime?

Looking into data, the number of beehives is steadily increasing. Sadly it doesn't suffice the growth in number of people worldwide. The amount of beehives per person is still smaller than 50 years ago.
